

Walison Teodoro da Silva

About

Graduated in Civil Engineering and graduate student in Analysis and software development and Quality powders, test, and software development. 3 years of experience as a Software Engineer specializing in Front-end development working with Javascript libraries and frameworks, successfully delivering efficient software solutions based on these technologies.

Technologies

Javascript, Typescript, React, Vue3, Redux, Redux-saga, ContextAPI, API Rest, Testing library, Cypress, Jest, Styled-components, TailwindCSS, windiCSS, storybook and more.

Work Experience

Hostfully – *Front-end (jan 2023 - until now)*

- Developing a platform that helps clients to automate processes while managing their host properties.
- React with Typescript
- Tests with cypress
- GraphQL
- Styled-components

Apegro – *Front-end React with NextJS (jun 2022 - nov 2022)*

- Developed a specific company solution to deal with the employees and the remote work, using chat, audio call and video meetings.
 - NextJS with Typescript.
 - Automated unit and End-to-end test with cypress and playwright to compare their performance.
 - Structured contextAPI to organize the different contexts and handle global states.
 - GraphQL with Apollo for integrations.
 - TailwindCSS for styles.
 - Storybook.
 - Performed code reviews and code quality control to ensure optimal production results.
-
- Developed a job platform called Gigster.
 - NextJS and typescript.

- Wrote unit and End-to-end test with cypress and playwright to compare their performance.
- Automated End-to-end tests and Unit tests using Cypress to ensure the application workflow.
- GraphQL with Apollo for integrations.
- TailwindCSS for styles.
- ContextAPI for global state management and Tailwind for styles.
- Performed code reviews and code quality control to ensure optimal production results.

ApexGo – *Front-end Vue (jan 2022 – jun 2022)*

- Developed the front-end of a NFT rarity comparator website.
- Vue3 with Typescript
- Implemented new features and copied figmas prototype as pixel perfect.
- Structured Pinia for global state management.
- Axios for REST integrations.
- Used WindiCSS for styles.
- Implemented ways to connect with crypto wallets such as Metamask and Tronlink using decentralized concepts.
- Performed code reviews and code quality control to ensure optimal production results.
- Used Vercel to deal with CI/CD

Oracle – *Front-end React (aug 2021 – jul 2022)*

- Developed the front-end of IPlace e-commerce using.
- React and Typescript.
- Implemented new UI/UX and fixed some bugs.
- Designed and developed the project based on the Oracle Store Front (framework based on top of ReactJS)
- Structured Redux and Redux-saga middlewares to handle all the integrations
- Performed code reviews and code quality control to ensure optimal production results.

Cortex – *Front-end React (jan 2021 – sep 2021)*

- Developed the front-end of a medical and aesthetic scheduling platform for a clinic franchise.
- Using ReactJS with Typescript.
- Structured Redux and Redux-saga middlewares to handle all the integrations.
- Styled-components for the styles.
- Axios for REST integrations.
- Many pair programming to help the team.
